Faculty Development Programme on Socio-Economic Impact of Transformation in Industry: Challenges and Opportunities

1. Importance of the course

With physical and digital worlds merging, manufacturing processes are changing dramatically in the current age. Can it be called a Revolution? Academicians and Industry experts say it can be. A new term "Fourth Industrial Revolution" is gaining momentum. In such a transformative era, what is the interlinkage of Industry, Economy and Society? The course endeavours to address such questions. The programme will involve experts/resource persons from various social science disciplines such as Economics, Management, Psychology and Sociology to acquaint the participants in the issues and perspectives on Industry, Economy and Society. Such an exercise will immensely aid the teachers, students and industry professionals in developing their knowledge of inter-relationship of economy, industry and society. The short term course intends to deliberate upon different concepts, theories, models and issues pertaining to the above mentioned research field which the participants will find very useful for their own understanding and future research.

2. Brief objective of the course

This course aims to provide and develop knowledge, skills and attitudes of faculties and professionals who aspire to build their career in the areas of Economics and Sociology of Work and Industry. The proposed course poses the question whether in the new economy, the nature of work has changed, and if it has, the extent to which these changes are affecting the lives of people on and off the job. The primary objective of this course is to focus on changes in market, industry and labour processes. The course intends to explore the themes, issues and perspectives on industrialisation, work and occupations in the interdisciplinary field of Economics, Management and Sociology.

3. Course Contents in brief

- Historical Context of Development of Industry
- Dimensions of Post-Industrial Society
- Global Inequality and Development: Social Perspectives
- McDonaldization: Impact of Industry on Society
