3. The word 'Para' used in item be replaced 'audit observation in reports.

Item No.67.11: To report the status of loan availed under HEFA.

RESOLUTION No. BG/27/2023: The Board has taken a presentation on the status of HEFA loan at **Appendix-G** alongwith the cost escalation on construction of 800 seater students' hostel awaiting MoE approval was also considered.

The Board considered the recommendations of the Finance Committee and resolved that the Ministry be informed the following facts for demand of cost difference as the Board had approved the CPWD estimates of Rs.125.67 cr in November 2017 itself:

1. The CPWD had initially submitted an estimate of RS.125.67 cr which was approved by the BoG in its 55th meeting held in November 2017. In tendering process which was initiated at early date, however the lowest bid came Rs.76.97, in view of this Ministry sanctioned only 80 crore for HEFA loan.
2. The height of four partially built blocks was reduced to 30 meters from 32.4 meters (10 stories-30m+2.4m stilt parking) as per the Haridwar Roorkee Development Authority (HRDA).
3. Tender cost does not include the cost of standard escalations like ESI & EPF, 10CA and 10CC and Contingency.

Item No.67.14: To consider a proposal for revision of relocation allowance as admissible in Inter-IIT Faculty Exchange Scheme.

RESOLUTION No.BG/30/2023: The Board considered the recommendations of the Finance Committee and resolved to approve the revision of relocation allowance in faculty exchange scheme to 20 percent of the basic pay payable from IRG.

Any Other Item

Item No.67.15: To consider the proposal to amend Clause 22 (1) on Head of the Department in the Statutes at par with other IITs.

RESOLUTION No.BG/31/2023: The Board considered the proposal to amend Clause 22(1) of the Statutes of IIT Roorkee at par with other three old IITs as given in the **Appendix-H.**

The Board also observed that due to a minor difference in the clause on selection of Head of the Department as in the Statutes of IIT Roorkee to other IITs, the Institute encountered a litigation from High Court to Supreme Court since 2019 which could have otherwise avoided.

The Board after deliberated on all the points and resolved to recommend the proposal for amendment in Statutes 22(1) to bring this clause at par with other IITs. The recommendations on change be sent to the Ministry in accordance to Clause 27 of the IIT Act, 1961 to process for Visitor approval.

Item No.67.16: To consider a proposal to establish a new Centre i.e. Centre for Sustainable Rural Development (CSR D).

RESOLUTION No.BG/32/2023: The Board considered the recommendation of the 97th Senate meeting and resolved that the proposal to establish a centre – “Centre for Sustainable Rural Development (CSR D)” be approved without any financial liability. **Appendix-I**

CENTRE FOR SUSTAINABLE RURAL DEVELOPMENT (CSR D)

1. SUMMARY

The significance of science, technology, and innovation in the potential transformation of rural economies and the achievement of sustainable development goals (SDGs) is realized. The Indian Institute of Technology Roorkee proposes to establish a Centre for Sustainable Rural Development (CSR D) with the aim to develop and harness science and technology-based solutions for rural development. The centre will focus on the following research areas: Renewable energy sources, waste management, agriculture and water management, food preservation and processing, rural innovation and product development, strategic planning, and entrepreneurship.

IIT Roorkee has reached significant milestones on its journey to creating a sustainable and equitable society through innovative research in science and technology (S&T). Through the proposed centre, the institution aims to carry the benefits of S&T to the rural areas for their holistic development, and acceleration of SDG localization. In line with the Prime Minister's vision of an Atmanirbhar Bharat, it is imperative to make the villages of India self-reliant. This calls for the creation of livelihood opportunities locally through sustainable management of renewable natural resources, and capacity building of the village communities for high-value employment and entrepreneurship development locally. While serving society is a social responsibility of educational institutions, it is crucial to learn and absorb the traditional knowledge and best practices existing in the field into the curriculum that lays the foundation of what the upcoming generation learns at educational institutions.

In view of this, CSR D at IIT Roorkee will be instrumental in understanding rural development needs and challenges, addressing those challenges through technological solutions developed by them, and serving as a hub for innovating new solutions based on the identified needs. The centre will design and implement capacity-building activities to skill, reskill and upskill the village communities to achieve the above goals.

The center will offer Ph.D. programs, and rural internships for B.Tech./M.Tech. students, and short-term training courses which will present opportunities for rural immersion, and foster community engagement and social responsibility among the highly trained workforce. Faculty members who are already working at the various departments and centers at IIT Roorkee in areas that can directly or indirectly contribute to the growth of the proposed center would be appointed as joint faculty or on deputation to run the center, resulting in a cross-disciplinary approach to the problem in question. A list of ongoing projects related to Rural Development and associated faculty members of IIT Roorkee is enclosed as Annexure-I. The proposed centre aims to create "The Next Generation Villages" by leveraging science and technology across various disciplines.

The centre will actively seek funds from research and consultancy projects sponsored by Government Agencies and Industries for building office and laboratory space, and for recruiting core faculty, technical, and supporting manpower.

2. INTRODUCTION

(i) Development scenario in rural India – Need for a change

India is predominantly a rural country with about two-thirds of its population and 70% of the workforce residing in rural areas (National Informatics Centre, Government of India). It is long believed that the development of India can only be realized if her villages become self-reliant. The journey of India towards an Atmanirbhar Bharat calls for a holistic, inclusive, and sustainable development model focused on the upliftment of rural counterparts as well.

23 AUG 2023

Agriculture, with its allied sectors, is the largest source of livelihood in India. 70 percent of its rural households still depend primarily on agriculture for their livelihood, with 82 percent of farmers being small and marginal. However, the sector struggles with a lack of sustainability, limited value-addition avenues, food processing, and cottage industries at the local level.

The rural economy constitutes 46% of the national income, of which two-third is generated through non-farm activities such as manufacturing, construction, etc. Surprisingly, there are no significant employment gains or reduction in disparity in worker productivity. A large proportion of the working rural population is still unskilled and grapples with the limited availability of appropriate livelihood opportunities at the local level.

The western developmental paradigm based on centralized technologies and urbanization has resulted in huge fundamental disparities between urban and rural India. The gaps encompass all spheres of life namely socio-economic, cultural, environmental, health, basic amenities, etc. thereby resulting in increasing inequity, crimes, ecological degradation, climate change, large-scale migration, and drudgery to name a few. The prominent face of migration became evident during the recent COVID-19 pandemic which triggered mass-scale reverse migration reinforcing the loopholes in the unsustainable and non-resilient economic developmental model of the country.

Post-COVID, as the country gears up towards Azadi ka Amrit Kaal, the vision of our Hon'ble Prime Minister, Shri Narendra Modi, gives a direction to meeting one of the most important developmental challenges being faced today. However, at present, the technologies that trickle down to the rural sector originate from an urban-centric perspective and are often borrowed from Western countries. Therefore, the existing technologies are not fully capable of addressing the unique needs and challenges of the rural population. In addition, the diversity across India in the landscapes, socio-cultural patterns, and agroclimatic conditions presents difficulties in understanding the local needs and developing relevant technologies. The potential of new technologies that can specifically cater to rural populations is largely unexplored. There is a vast scope for developing technologies, customizing existing technologies, and validating them to fit rural needs.

(ii) Addressing rural development challenges through Science Technology and Innovation at IITs

The Government of India considers the rapid development and empowerment of the rural population a matter of high priority and recommends that the Indian Institute of Technology (IITs) take a lead role in developing and disseminating rural-centric technologies. IITs are the centers of excellence in training, research, and development in the field of science, technology, and engineering. IIT Roorkee is strategically located in the foothills of the Himalayas and can help in covering isolated rural communities and reaching the last mile in India's journey for rural development. Many IITs already have a dedicated center for rural development including the Centre for Rural Development and Technology, IIT Delhi; Centre for Technology Alternatives for Rural Areas, IIT Bombay; Centre for Rural Development and Innovative Sustainable Technology, IIT Kharagpur; School of Agro and Rural Technology, IIT Guwahati; Rural Development Centre, IIT Hyderabad; and Centre for Rural Development and Technology, IIT Indore. Similarly, IIT Roorkee is proposing to build a center that can serve the rural population in the neighboring rural areas of Uttarakhand, Western Uttar Pradesh, parts of Punjab, and Haryana.

IITs are well-equipped with the required expertise and resources to contribute to rural development through the utilization of science and technology. Similar to building capacities in the private sector, IITs can be potential hubs for undertaking skilling and training activities for the rural sector. The dedicated centres on rural development could specialize in understanding community needs through participatory approaches to guide and inform the scientific interventions for ensuring appropriate benefits to society. In addition, such premier research institutions are well-placed to inform policies impacting rural development and work in convergence with government regulators to facilitate knowledge-sharing for their effective implementation.

Faculty members at various departments of IIT Roorkee are already engaged in research projects and national programs that directly or indirectly contribute to rural development. For instance, IITRoorkee is an active participant in the **Unnat Bharat Abhiyan (UBA)** initiative. Some of the issues addressed are improvement in skill development for unemployed youth, quality of school education, agriculture, sanitation, health care, awareness towards digital India, renewable energy use, and self-reliance. In another instance, the **Rural Technology Action Group (RuTAG)** at IITRoorkee is providing technical support for various sectors like agriculture, handicrafts, and energy-related projects in Uttarakhand and Himachal Pradesh with the support of the Government of India. Under the activities, various technologies developed by RuTAG IIT Roorkee viz. advanced Bageshwari wool charkha, solar energy-based turpentine oil plant, a Pico hydro powered cold stage, pomegranate seed extraction machine, wool processing have already been developed.

3. MISSION AND OBJECTIVES

The mission of the CSRD is to follow a holistic approach towards the advancement of Rural India (RI) through interdisciplinary research, development, and innovation leading to a strategic framework and micro-level Plan of Action (PoA) clearly defining roles of various stakeholders including government, industrial, academic and rural sectors.

To tap the sustainable development momentum, India now needs to build a sustainable rural development eco-system that brings in a strong partnership across the industry players, government, and academia leading to employment generation, strengthening of livelihood opportunities, promoting self-employment, skilling of rural youths, provision of social assistance, and infrastructure development while integrating mechanisms for incorporating and formulating Indian traditional wisdom in the modern development framework for rural areas.

Some of the key actions for the Sustainable Rural Development eco-system would be:

➤ Creation of Talent Pool –

- ❖ To bring together a strong team of scientists and researchers working in the areas of Rural Development and Technology, with a focus on a multitude of interdisciplinary applications such as Agriculture, Irrigation, Sanitation, Waste Management, Food Supply Chain, Innovation Products (domestic and commercial), Self-Employment, Rural Entrepreneurship, Business Models, etc.

➤ Collaboration –

- ❖ To form a Rural Development forum across organization boundaries to discuss the mainpoints of the practitioner community and share best practices to scale it up.
- ❖ To provide a platform to increase research productivity and facilitate collaborations within IITR.
- ❖ Create *industry-academia* partnerships to groom the talent pool in universities as well as to develop a strong internal training curriculum to advance analytical depth.

➤ Capacity Development –

- ❖ Invest in long-term skills and capabilities that form the basis for differentiation and value creation. There needs to be an innovation culture that will facilitate IP creation and asset development.
- ❖ To provide a platform for the training of highly qualified personnel (HQP) by hosting post-doctoral fellows, and visiting professors, as well as creating opportunities for undergraduate research.
- ❖ To host events that would bring together researchers at IITR, and others from institutions in India and around the world.

➤ Value Creation –

- ❖ To generate further funding opportunities relevant to sustainable rural development by leveraging existing research expertise and capacity at IITR.

- ❖ To promote and foster indigenous technologies in the country and to develop core generic technologies, for wider applications in the rural sector.
- ❖ To understand the present status of the rural sector in terms of market size, different players providing services across sectors/ functions, opportunities, SWOT (Strength Weakness Opportunity and Threats) analysis, policy framework (if any), present skill levels available, etc.
- ❖ To carry out a market landscape survey to assess the future opportunities and demand for skill levels in the next 10 years
- ❖ To carry out a gap analysis in terms of skills levels and policy framework.

4. THRUST AREAS

The initial focus of the CSRD will be on the following areas listed below (subject to revision from time to time).

- A. Participatory Science
- B. Agriculture and Water Management
- C. Renewable Energy and Rural Waste Management
- D. Food Preservation and Processing
- E. Rural Innovation and Product Development
- F. Smart Villages
- G. Capacity Building
- H. Strategic Planning and Entrepreneurship

- A. Participatory Science:** To bring about any positive change in rural livelihoods, it is crucial to understand the local communities, their needs and challenges, and the existing solutions employed by the communities. This thrust area will focus on developing citizen science approaches to address various issues faced by the rural population. The issues could include water quantity and quality, and agricultural productivity. For example, IIT Roorkee can administer farmer yield contests in which farmers can showcase their crop yields and exchange knowledge about best management practices that can help bolster crop yields across the region. The citizen science approach can also help in creating a new source of data to conduct scientific research.
- B. Agriculture and Water Management:** Aim of this trust area is technology transfer, the creation of small-scale cottage industries and consequent employment generation, exploring and implementing the opportunities for improving the farming potential to enhance yield and income, especially in the low productivity regions (hilly areas of Uttarakhand). Some focal areas will be the exploitation of rainwater for crops (capture water -rainwater harvesting, soil, and water conservation-, and using it - deficit irrigation; supplementary irrigation etc.); on-farm water management for minimizing water losses through evaporation; development and usage of improved crop varieties; improved cropping systems and agronomics, farm mechanization, possibilities of using low-quality water for non-conventional (not for direct human consumption) applications such as social forestry; determination of quantity and quality available for agriculture use and rethinking crop scheduling; conversion of agro-waste to valuable products, production of humic and ferulic acid; irrigation technology for and water purification, Usage of data science for precision agriculture; application of AI and IoT for irrigation management, market linkage, etc.
- C. Renewable Energy and Rural Waste Management:** Energy is considered one of the main drivers for the development of any sector in a country, rural development and technology intervention and innovation also depend on available energy (electricity) in rural areas. As it is a known fact, that there is a lot of problem with electricity in rural areas despite the rampant electrification done by the Government which can still further be solved by generating electricity using locally available energy resources (Renewable energy sources). All renewable sustainable energy and waste management methods are mandatory to be exploited seriously as practiced nationally and internationally. Energy sources (Hydropower, wind, solar, and agro and marine biomass-based biofuels) need serious technological innovation to surpass the degenerative conventional sources of energy. Rural waste

management is already utilized to some extent but not fully managed for the use of the agriculture sector and energy production.

- D. Food Preservation and Processing:** The emphasis here will be on developing methods for food preservation and processing in rural areas with the aim of generating self-employment and creating business opportunities; developing processing facilities to reduce post-harvest losses, enhancing the shelf life of the agro produce and efficient use of the by-products. Processing at the village level will also encourage the proper use of farm produce, crop residue, animal power, and commercial forestry products.
- E. Rural innovation and product development:** The focus will be on developing low-cost, eco-friendly solutions and technologies for supporting a comfortable and respectable lifestyle for people of rural areas, particularly for the hilly areas of Uttarakhand. The work will be done in the areas of agri-tools, artisanal tools related to wood carving, carpentry, blacksmith, handloom and handicrafts, pottery etc., along with domestic tools, eco-friendly toilets and mobility devices.
- F. Smart villages:** The target of this thrust area will be on harnessing digital technology toward rural empowerment through ICT and CPS. The focus will be on block-chain enabled food supply chain for food security, safety, and integrity and also to reduce the intervention of middle-men, precision farming, artificial intelligence, automated farming activities, contract farming, IoT-based solutions for livestock monitoring, irrigation monitoring, etc., weather- controlled storage houses, E-portals for various services including general awareness about Government schemes, and employment opportunities, user-friendly village-based apps (V- Apps), E-health / E- veterinary services.

Fig. 1 Initial Thrust Areas for the proposed Center for Sustainable Rural Development, IIT Roorkee

- G. Capacity Building:** The focus of this thrust area would be to empower the rural communities, especially women and youth, through targeted workshops and training programs. Women are the key drivers of transformational change in rural communities. This thrust area will focus on the overall development of rural women by improving their access to technical knowledge, health care, and economic opportunities. For instance, in the hills of Uttarakhand, women are actively involved in small enterprises like pickle and juice production. IIT Roorkee can add value to the existing small and medium-scale industries in rural communities through technological interventions. Gainful employment of youth plays a pivotal role in improving the socioeconomic conditions of rural households. Rural youth lack exposure to future career opportunities and access to coaching centers for college preparation. This thrust area will focus on educating pre-college youth about various career opportunities in different industries. In addition, IIT Roorkee can provide a platform for skill development and internship programs for rural youth.

H. Strategic planning and entrepreneurship: This thrust area is primarily devoted to rural planning and decision-making by identifying the prominent areas needing improvisation. This will include rural business models and cooperatives, diversification of rural economic activities, statistical analysis, rural development reports, rural enterprise development, improvisation of community facilities, human resource development, women empowerment, new value chains, etc. development of financial frameworks to provide incentives for the adoption of best practices and new technology, benchmarking and policy formulation.

Participating Departments (alphabetical order): the success of the center will be due to the collaborative efforts of different departments including:

- ❖ Architecture and Planning
- ❖ Biosciences and Bioengineering
- ❖ Civil Engineering
- ❖ Chemical Engineering
- ❖ Computer Science and Engineering
- ❖ Department of Design
- ❖ Earth Sciences
- ❖ Electronics and Communication Engineering
- ❖ Humanities and Social Sciences
- ❖ Hydrology
- ❖ Hydro and Renewable Energy
- ❖ Management Studies
- ❖ Mechanical and Industrial Engineering
- ❖ Polymer and Process Engineering
- ❖ Paper Technology
- ❖ Water Resources Development and Management

5. PROPOSED ACTIVITIES

I. Research in the First Phase

The center will promote R&D projects and consultancy to generate funds. The prime focus in the initial stage of the proposed center will be on sponsored and consultancy research projects by involving interested faculties of different departments of IIT Roorkee together with outside visiting faculties /researchers and village-level representatives. The other activities which will also be considered are Startups and Entrepreneurship Programs. Funding may also be arranged from Industry sponsored CSR which will be strong support for this program.

II. Teaching Programs in the Second Phase

The center proposes to run **Ph.D. Degree Program**. This program may run on modular/ sponsored mode or may also run through open admissions. The center will also offer **Certificate Courses:** Training Programmes (TP) and Specialized Programmes (SP) will be organized from time to time for professionals in various areas of Rural Development and Technology. The center will offer Rural Research Internships to the B.Tech. and M.Tech. students from various departments and centers of IIT Roorkee. The rationale is to expose the students to real-world problems faced by the rural population.

III. Training Program

The centre proposes to organize Training Programs, workshops, and specialist courses to train farmers, weavers, and other professionals (e.g. postgraduate diploma in rural management) as per the demand. The major focus will be on skill enhancement, the generation of rural entrepreneurial activities, and start-up initiatives in rural India.

Table1. Proposed Activities of the Centre

S. No.	Proposed Activity	Proposed date of Start
1	Initiating Research projects	July 2023 (Phase-I)
2	Offering Ph.D. degrees	July 2023 (Phase II)
3	Offering Rural Internships for BTech/MTech Students	May 2024 (Phase II)

6. ADMINISTRATIVE STRUCTURE

Coordinator-Centre for Sustainable Rural Development (CSRDCo-
coordinator- Centre for Sustainable Rural Development Center-
Professorial Committee (CPC)
Center-Faculty Committee (CFC) Center-
Research Committee (CRC)
Center-Academic Program Committee (CAPC)
Center-Administrative Committee (CAC)

7. REQUIREMENT OF FACULTY/ SCIENTIFIC LABORATORY MANPOWER, EQUIPMENT, AND BUILDING SPACE

➤ Faculty/ Scientific Manpower

In the initial phase, one Coordinator and a minimum of 6 faculty members belonging to core and application areas will suffice the basic requirements for running the center. These faculties may be hired on a deputation basis. They may also serve the center as joint faculty, having a substantive position in their respective parent department as per the Institute's norms. The center will analyze the requirements from time to time and will hire new faculties from time to time.

➤ Establishment of Professional Chairs

The Centre will approach relevant funding agencies and alumni of IIT Roorkee to create Professional Chairs in the center.

➤ Technical/ Supporting Manpower:

The center may be provided with 4 officiating staff for managing the administrative/ technical works:

Technical Assistant
Assistant
Steno cum PC operator
System Administrator

➤ **Research Staff**

JRF/ SRF/ RA/ Research Fellows, Post-Doctoral Fellows will be admitted through CSIR, UGC, and DST schemes, etc. Additionally, industrial sponsors shall be contacted to support the program.

➤ **Laboratory Requirements**

- (i) Existing Workshops shall be used to develop/fabricate equipment required for the Centre.
- (ii) Creation of Research laboratories for new faculties and students.
- (iii) Prototype product development labs

➤ **Building Space**

The minimum need-based requirement will be for basic laboratories including a computer lab, Faculty offices, sitting space for research scholars, and a conference/ committee hall.

8. INITIAL FINANCIAL OUTLAY

The proposed center will act as a facilitation and coordination hub for various activities involving around 100 Higher Educational Institutes attached to *Unnat Bharat Abhiyan (UBA) IIT Roorkee*. It is proposed that this center will fund the establishment of the Rural Incubation Cell in these institutions for catering to the technical needs of rural innovators from their UBA-mandated rural areas and villages. For the establishment-related expenditure involving the initial phase of the coordinating activities, seed money from the institute will be essentially required. Sponsored projects from Government agencies/CSR funds from Industry/Consultancy projects will also be attempted to support the **CSR** activities.

9. FUNDING OPPORTUNITIES

Sponsored R&D and Consultancy will be an integral part of the Center. Various ministries/ agencies will be approached for funding the center. For example:

- ❖ Ministry of Rural Development (MoRD)
- ❖ Ministry of Agriculture and Farmers Welfare
- ❖ Indian Council for Agriculture Research (ICAR)
- ❖ Ministry of Food Processing Industries
- ❖ Ministry of Environment and Forests (MoEF)
- ❖ Ministry of Jal Shakti
- ❖ Ministry of Micro Small and Medium Enterprises (MSME)
- ❖ Ministry of New and Renewable Energy (MNRE)
- ❖ Central Pollution Control Board (CPCB)
- ❖ Department of Biotechnology (DBT)
- ❖ Department of Science and Technology (DST)
- ❖ Ministry of Education
- ❖ Ministry of Tourism
- ❖ Ministry of Skill Development and Entrepreneurship
- ❖ Ministry of Culture
- ❖ *Private organizations/agencies:* CSR funding from organizations like Bill and Melinda Gates Foundation, IBM Research, HDFC bank, Reliance, Hindustan Lever, Adani Group, etc.

10. List of contributing faculty members

Following is the list of faculty members who are willing to join hands to form the Center. We anticipate a significant increase in membership once the Center is established.

1. Prof. K.K. Pant, Chemical Engg. and Director, IIT Roorkee
2. Prof. Gaurav Raheja, Architecture and Planning
3. Prof. Smriti Saraswat, Architecture and Planning
4. Prof. Partha Roy, Biosciences and Bioengineering
5. Prof. Pravindra Kumar, Biosciences and Bioengineering
6. Prof. Naveen Kumar Navani, Biosciences and Bioengineering
7. Prof. Praveen Kumar, Civil Engineering
8. Prof. Bhanu Prasad Vellanki, Civil Engineering
9. Prof. R.D. Garg, Civil Engineering
10. Prof. Pitamber Pati, earth Sciences
11. Prof. Vimal Chandra Shrivastava, Chemical Engineering
12. Prof. Prakash Biswas, Chemical Engineering
13. Prof. B. Prasad, Chemical Engineering
14. Prof. Sushil Kumar, Chemical Engineering
15. Prof. Sandeep Kumar Garg, Computer Science and Engineering
16. Prof. Indradeep Singh, Department of Design
17. Prof. Bibhuti Ranjan Bhattacharjya, Department of Design
18. Prof. Dheeraj Khatod, Electrical Engineering
19. Prof. Anand Bulusu, Electronics and Communications Engineering
20. Prof. Ram Manohar, Humanities and Social Sciences
21. Prof. Shruti Sengupta, Humanities and Social Science
22. Prof. Pratham Arora, Hydro and Renewable Energy
23. Prof. Sanjeev Kumar Prajapati, Hydro and Renewable Energy
24. Prof. Vinay Sharma, Management Studies
25. Prof. Rajat Agrawal, Management Studies
26. Prof. Akshya Dvivedi, Mechanical and Industrial Engineering
27. Prof. Manish Mishra, Mechanical and Industrial Engineering
28. Prof. Dharam Dutt, Head, Paper Technology
29. Prof. Pradip K. Maji, Polymer and Process Engg.
30. Prof. Anil Kumar Gourishetty, Physics
31. Prof. Ashish Pandey, Water Resources Development & Management
32. Prof. Kritika Kothari, Water Resources Development & Management
33. Prof. Basant Yadav, Water Resources Development & Management
34. Prof. S.K. Mishra, Water Resources Development & Management

ANNEXURE-I

List of ongoing projects related to Rural Development at IIT Roorkee

Faculty Member	Projects
Prof. Bibhuti Ranjan Bhattacharjya, Design	1. Design and development of Coffee Harvesting Machine: sponsored by the Central Coffee Research Institute, India 2. Developing a roadmap for the handloom industry of Tripura Sponsored by NABARD
Prof. Shruti Sengupta, Humanities and Social Science	1. Peer Effects on Intra-Household Bargaining and Consumption Diversification in Times of the Covid-19 Pandemic'.
Prof. Shushil Kumar, Chemical Engg.	1. Design, exploration, and process concept study of direct liquefaction of agricultural and forest residues and lignin into bio-crude in batch mode.
Prof. Pradip K. Maji, Polymer and Process Engg.	1. Lightweight thermal super-insulating aerogel made by using hybrid cellulose nanomaterials extracted from waste biomaterials for building and advanced applications; Sponsored by SERB, DST, Govt of India 2. Scientific Management of Natural Resources for Sustainable Development in UBA Clusters of Shivalik Region; Sponsored by DST, Govt of India.
Prof. Ashish Pandey, WRDM	1. Irrigation Efficiency Improvement through On-Farm Water Management. Sponsored by Ministry of Jal Shakti, Department of Water Resources & RD and GR, Govt. of India. 2. Gramin Krishi Mausam Sewa (GKMS). Sponsored by Ministry of Earth Science, Govt. of India, New Delhi. 3. Forecasting Agricultural output using Space Agrometeorology and Land-based Observations (FASAL). Sponsored by Ministry of Earth Science, Govt. of India, New Delhi. 4. Unnat Bharat Abhiyan 2.0. National Coordinating Institute, IIT Delhi, Ministry of Education, Govt. of India.
Prof. Basant Yadav, WRD&M	1. Design of Climate Resilient Managed Aquifer Recharge Strategy for Safe Water Supplies and Improved Groundwater Protection in Hindon River Basin, Sponsored by: SERB, Govt. of India. 2. Community-based Managed aquifer recharge (CoMAR) in rural clusters: A tool for sustainable and safe drinking water supply. Sponsored by: Jal Jeevan Mission, Ministry of Jal Shakti.
Prof. Surendra K. Mishra, WRD&M	1. Green technology for detection of leakage & heavy metals and prevention of choking in pipe networks and its demonstrations in Himalayan setups Sponsored by: NMHS, MoEF&CC
Prof. Thanga Raj Chelliah, WRD&M	1. Design and Development of Municipal-Solid-Waste-Fueled Battery Charging Station Using Solar Assisted Plasma Pyrolysis. Sponsored by: Ministry of Education (under Swachhta Action Plan)
